About Me

I'm an iOS & Web developer, designer and writer. Over the past five years, I've been involved in nearly every facet of iOS development. I've worked on small teams, helping build/advise them and also large-scale corporations; have been offered employment by top tier tech companies (and startups) around the world. I've seen projects fly high with hundreds of thousands of users (and tens of millions of requests) yet witnessed others crumble. But all the while, I love technology.

Key Skills and Expertise

- Extensive experience in iOS development (Xcode, Objective-C, & Swift, 5+ yrs)
- Third party APIs (Forecast.io, AFNetworking, Parse, TestFlight, OpenTok, etc.)
- Web technologies such as HTML, CSS, JS and PHP
- MEAN stack; backend development
- Design tools including Photoshop, Sketch, Lightroom, etc
- Project Leadership & Business applications
- Knowledge in cloud-based technology and REST integration
- Testing, Debugging, and Documenting; git and peer programming
- Agile Software Development & DRY
- Rapid (and gradual) Project Deployment
- Collaborative, leadership, and communication
